

Christopher Ryczke

Software Engineer

Software Engineer with 3+ years of programming experience. Fluent with all object-oriented languages such as Java, C# Python, frameworks such as .NET, XNA, and experienced in web development.

Projects

Portfolio Website

March 16, 2026 – July 8, 2026

A portfolio of my projects, consistently updated as time goes on. Features a resume, and built with HTML, CSS, and JavaScript.

Education

Computer Programming

Durham College

May 2025 – Current

Studying the Computer Programming & Analysis course at Durham College.

Strengths

Fast Keyboard Typer

Fast with hardware, especially keyboards. Will waste no time setting up or fixing any hardware, whether faulty or needed for a job to be done fast.

Efficient at Learning Multiple Programming Languages

Quick to study and learn new programming languages. Efficient in Python, C#, and Java primarily, but willing to learn any other languages required.

Proficient with Database Systems

Adaptable to multiple different types of SQL (SQL Server, PostgreSQL, etc..) and much like programming languages, can maneuver around many database systems.
